

QAPIRANGAJUQ

INUIT KNOWLEDGE AND CLIMATE CHANGE

Travel across pristine lands and hear directly from Elders, hunters and the Inuit people on what it means to live and love in a warming Arctic.

- DOCUMENTARY + DISCUSSION SERIES -

Join us for ice-cream and networking over a relaxed screening of Qapirangajuq: The world's first Inuktitut language film on climate change! Followed by spirited audience discussion with our experts in the Arctic, climate change and communication: **Dr. Shawn Marshall**, professor of Glaciology and Climatology and Canada Research Chair in Climate Change (2007-2017), **Dr. Chui-Ling Tam**, resource management expert and Arctic researcher in the Geography Department, **Dr. Mél Hogan** from the Communications, Media & Film Department, and more!

Qapirangajuq is produced by award-winning Inuk filmmaker Zacharias Kunuk, recipient of the Order of Canada, and Professor Ian Mauro of the Department of Geography at the University of Winnipeg, previous Canada Research Chair in Human Dimensions of Environmental Change.
